

NANOBIND®

SOIL MICROBES

Monty's Nanobind GUARANTEED ANALYSIS

Contains Non Plant Food Ingredients

Lactobacillus culture 1,000,000-cfu/ml
Saccharomyces Boulardii culture 3,000,000-cfu/ml

Application Rates

Mix ½ gallon of NanoBind® in a minimum of 15 gallons of water per acre. Application rates and the number of applications necessary will vary with the severity of the soil conditions. Please consult a technical sales representative from Monty's Plant Food for a custom designed protocol. Once diluted, product must be used within 24 hours. If soil temperature is below 45°F, performance is significantly reduced. Given the variables to consider, the number of applications prior to achieving desired results may vary.

FOR COMMERCIAL USE

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfc.org/metals.htm>

F. 1360 1621

Storage and Handling

Refer to the NanoBind® Material Safety Data Sheet for other safety and handling information. Store in a cool dry place above 45°F. Avoid storage in areas with direct sunlight. Do not store product in temperatures above 90°F. NanoBind® has a recommended shelf-life of 1 year from the manufacturing code stamped on the bottle.

Limited Warranty

For a period of 1 year from the manufacturing date, Monty's® warrants that this product meets its manufacturing specifications. If it does not, Monty's® will, at its option, replace the product or refund the purchase price. In no event shall Monty's® be liable for special, incidental or consequential damages or for damages in the nature of penalties. Monty's® shall not be liable in any way for claims resulting from any use of this product which is not in strict accordance with all directions, cautions and warnings on the label or labels.
